Professional Experience

Senior Business Intelligence Consultant

2020 – Present

Data Major – Lyon, France

- Built data pipelines using Azure Data Factory and SQL stored procedures in a DevOps environment, focused on optimizing efficiency by calculating package processing times for a key client.
- Led the charge in developing and implementing a DWH project with SSIS, collaborating closely with business users to generate actionable insights crucial for strategic decision-making.
- Set up log management through SQL and PowerBI, implementing real-time monitoring and automation. Proactively alerted leadership to potential issues, ensuring swift problem resolution.
- Engineered inter-application information exchange flows and executed reverse ETL with SSIS to seamlessly supply an e-commerce site with real-time data, boosting sales and reducing stock shortages.
- Applied ESB logic proficiency using Blueway to seamlessly connect disparate systems in retail and health companies. Streamlined information exchange, fostering seamless operations across diverse platforms.
- Led the training initiatives for 12 junior developers and 8 business users, imparting expertise in SQL, PowerBI, and SSIS. Also promoted a culture of continuous learning.

Junior Business Intelligence Consultant

2017-2020

Keyrus – Lyon, France

- Led comprehensive QlikSense application management, deploying the mobile version and implementing multilingual support for 8 key applications and more than 100 users. Ensured an intuitive, accessible, and culturally diverse analytics platform.
- Conducted engaging technical workshops with end-users, fostering a collaborative environment for knowledge exchange and empowering teams to leverage data effectively.
- Collected requirements and initiated new data flows using Talend, orchestrating seamless data movement and ensuring data integrity across the organization.

Junior Developer

2016-2017

Descours&Cabaud – Lyon, France

- Crafted Qlik dashboards for streamlined ERP data migration management, ensuring a smooth transition and minimal disruption to business operations.

Junior Developer

2015-2016

RTE – Lyon, France

- Engineered a sophisticated data integration process using VBA, expanding the product database and contributing to the company's growth trajectory.
